Thank you for having your product tested by NSF International.

Please contact your Project Manager if you have any questions or concerns pertaining to this report.

Report Authorization  
Nancy Cole - Director, Analysis Laboratories  
Date 18-NOV-2018
### General Information

- **Standard:** USFDA CFR Title 21 Part 165.110
- **Lot Number:** 101718 20
- **Product Description:** Deionized Water
- **Trade Name:** Crystal Springs

---

**Sample Id:** S-0001538006  
**Description:** Deionized Water | Deionized Water - 101718 20  
**Sampled Date:** 10/22/2018  
**Received Date:** 10/19/2018

Test descriptions preceded by an asterisk **(*)** indicate that testing has been performed per NSF International requirements but is not within its scope of accreditation.

The reported result for Odor, Phenolics, Potassium, Molybdenum, Silica, Total Phosphorus, Specific Conductance, Radon, Sr-89/90 and Total Residual Chlorine cannot be used for compliance purposes within the State of Arizona.

The reported results for Asbestos, Phenolics, pH, Chlorine Dioxide, Chloramines and Total Residual Chlorine are not covered by New York State certification.

Notes:

1) Bottled water sold in the United States shall not contain Fluoride in excess of the levels published by the USFDA in 21 CFR Part 165.110. These levels are based on the annual average of maximum daily air temperatures at the location where the bottled water is sold at retail. Please refer to the most current edition of the regulation to determine the Fluoride maximum level that pertains to your product.
2) A blank on the FDA SOQ column indicates that no maximum level has been established by the FDA for that contaminant.
3) An ND result means that the contaminant was not detected at or above the reporting limit.
